CLEANER, SAFER, HEALTHIER

WK GREASE, OIL & RESIN REMOVER ALU

Removes reliably:

- Greases and oils
- Resins
- Waxes
- Bitumen and tar residues
- Rubber and polymer residues
- Burnt-on contaminants
- General industrial contamination

Typical applications:

- Industrial (manual and mechanical) parts cleaning
- Cleaning of machinery and equipment
- Maintenance and servicing
- Cleaning of workpieces and components
- Suitable for industrial washing systems and immersion baths

Application:

Use ready to apply.
Can be used in immersion baths, cleaning systems or manually.
Apply cleaner, allow to act briefly and then remove contaminants using a cloth, brush or water.

- Prior to application, test material compatibility, effectiveness and required exposure time on an inconspicuous area.

Suitable surfaces e.g.:

- Aluminium
- Stainless steel
- Steel
- Brass
- Non-ferrous metals
- other sensitive metal surfaces
- Plastics (e.g. PP, PE, etc.)

Advantages:

- Not subject to CLP classification (no hazardous substance)
- Replacement for MEK, acetone, isopropanol and similar solvents
- Non-flammable
- VOC-free – contains no volatile organic compounds
- Suitable for aluminium
- Material-compatible cleaning
- Temporary corrosion protection
- REACH-compliant

Packaging:

Packaging unit contains 10 × 0.5 L bottles incl. sprayer.
Other container sizes available on request.
