

# Wandelkraft Chemie GmbH

CLEANER, SAFER, HEALTHIER

## WK POLYMER EXTRA

### Effectively removes:

- Greases and oils
- Adhesives
- Inks, paints and primers
- Sealant residues
- Silicones
- Resins
- Corrosion protection waxes
- Bitumen and tar
- Marking and protective coatings
- Burnt-on residues

### Typical applications:

#### Stubborn stains

- Removal of heavy contamination
- Cleaning of machinery, conveyor systems and equipment
- Removal of adhesive residues (e.g. labels)
- Maintenance and servicing
- Cleaning of workpieces
- Suitable for manual use and immersion processes

### Application:

Use at room temperature.  
Spray on or apply, allow to act briefly and then remove residues using a cloth or rinse with water.

### Suitable surfaces e.g.:

- Metals
- Stone surfaces
- Ceramics
- Plastics (e.g. PP, PE, etc.)
- Galvanized surfaces
- Steel and stainless steel
- Aluminium

### Advantages:

- Not classified according to CLP Regulation
- Replacement for MEK, acetone, isopropanol and similar solvents
- Non-flammable
- VOC-reduced (VOC content approx. 19%) – reduced evaporation rate
- Low-residue cleaning
- Temporary corrosion protection
- REACH-compliant

### Packaging:

Packaging unit contains 10 × 0.5 L bottles incl. sprayer.  
Other container sizes available on request.

- Prior to application, test material compatibility, effectiveness and required exposure time on an inconspicuous area.
