CLEANER, SAFER, HEALTHIER

## WK INK, PAINT & COATING REMOVER

### Effectively removes:

- Fresh and dried paint residues
- Pigment paints
- Inks and printing inks
- Coatings and varnishes
- Resins
- Adhesives
- Polymer and marking residues

### Typical applications:

- Cleaning of machinery and tools
- Removal of defects and contamination on end products
- Cleaning of printing and coating equipment
- Removal of paint and coating residues
- Industrial cleaning of workpieces
- Suitable for manual use, immersion processes and specialized washing systems

### Application:

Use at room temperature.  
Spray on or apply, allow to act briefly and then remove residues using a cloth or rinse with water.

- Prior to application, test material compatibility, effectiveness and required exposure time on an inconspicuous area.

### Suitable surfaces e.g.:

- Metallic surfaces
- Plastic and packaging surfaces (e.g. PP, PE, etc.)
- Steel and stainless steel
- Aluminium
- Coated and smooth surfaces, including industrial floors
- Machinery and tool surfaces

### Advantages:

- Not classified according to CLP Regulation
- Replacement for MEK, acetone, isopropanol and similar solvents
- Non-flammable
- VOC-reduced (VOC content approx. 45%)  
– reduced evaporation rate
- Low-residue cleaning
- Ready to use
- Suitable for industrial applications
- REACH-compliant

### Packaging:

Packaging unit contains 10 × 0.5 L bottles incl. sprayer.  
Other container sizes available on request.
